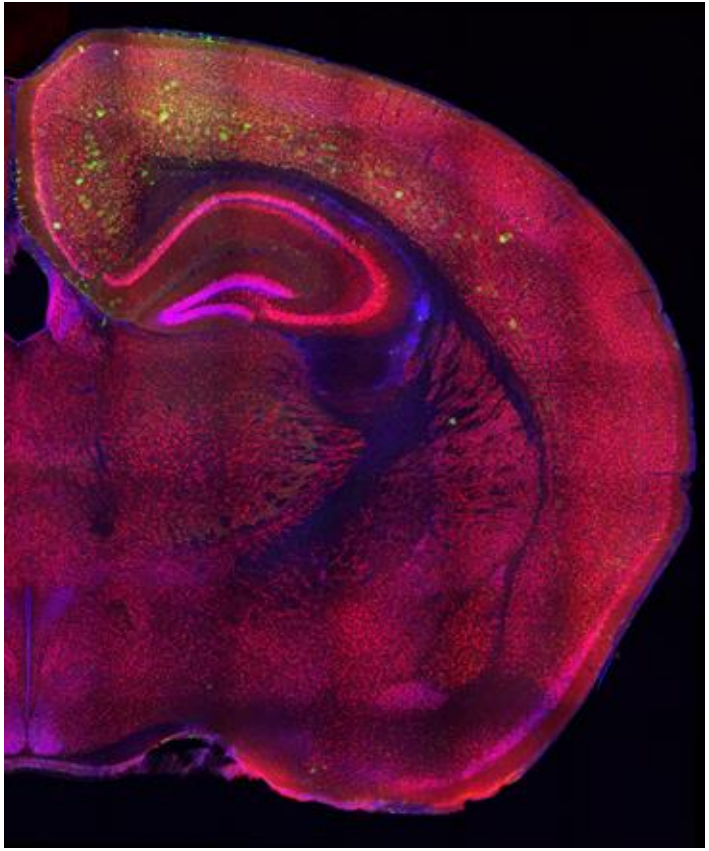
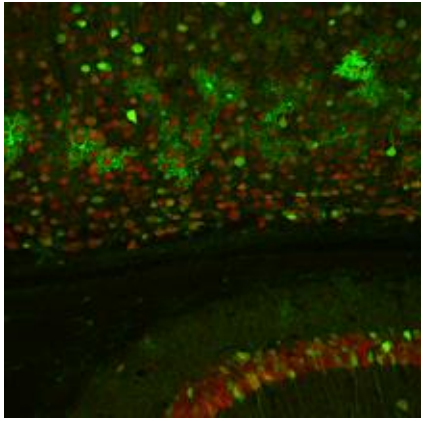
Using adeno-associated viruses (AAV) to deliver genetic cargo to the brain

Virus A

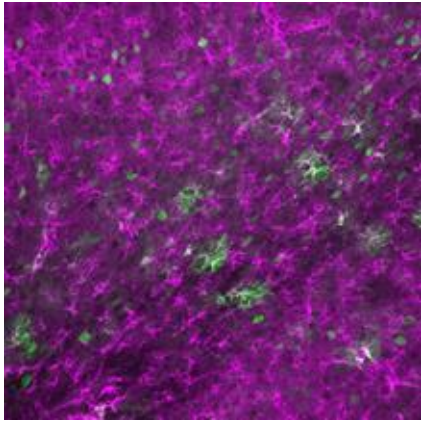
10x, GFP, NeuN

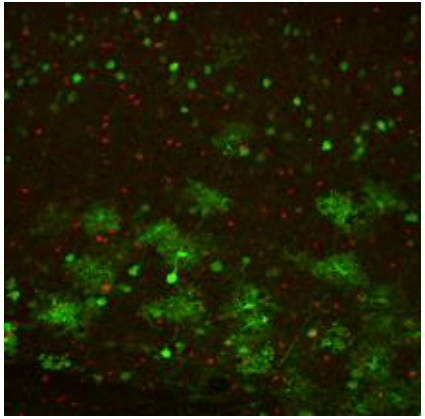


GFP, NeuN

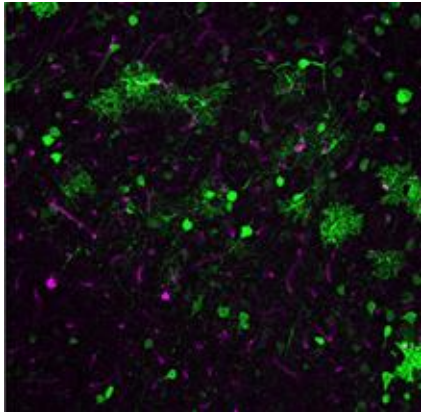


GFP, Aldh1





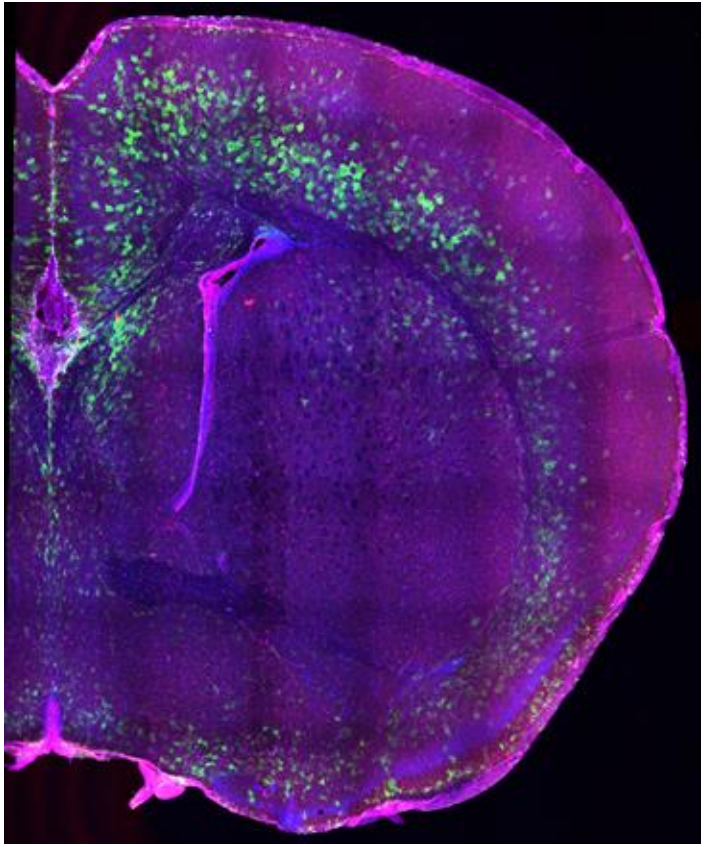
GFP, Olig2



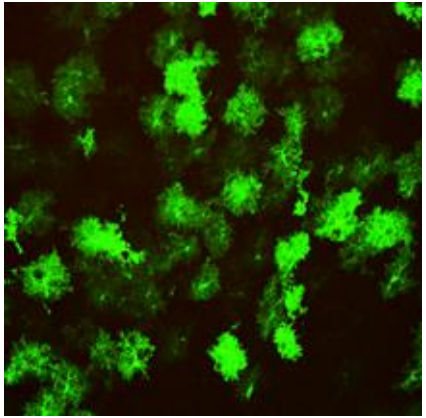
GFP, Lectin

Virus C

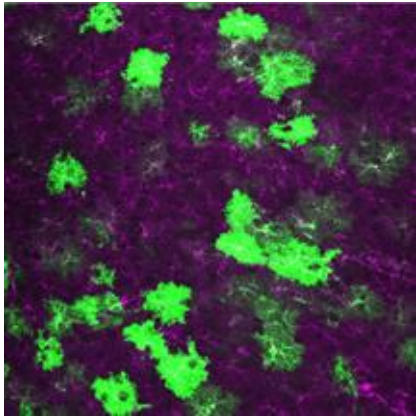
10x, GFP, Aldh1, Lectin

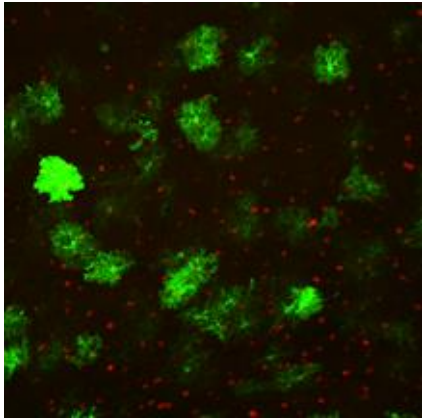


GFP, NeuN

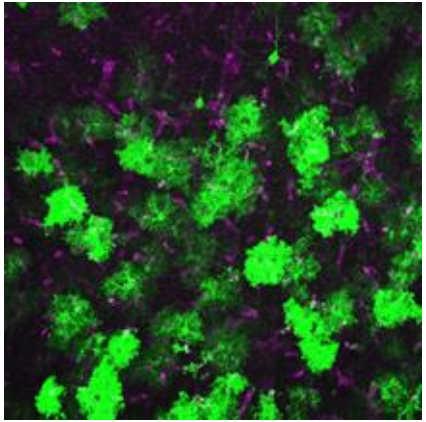


GFP, Aldh1



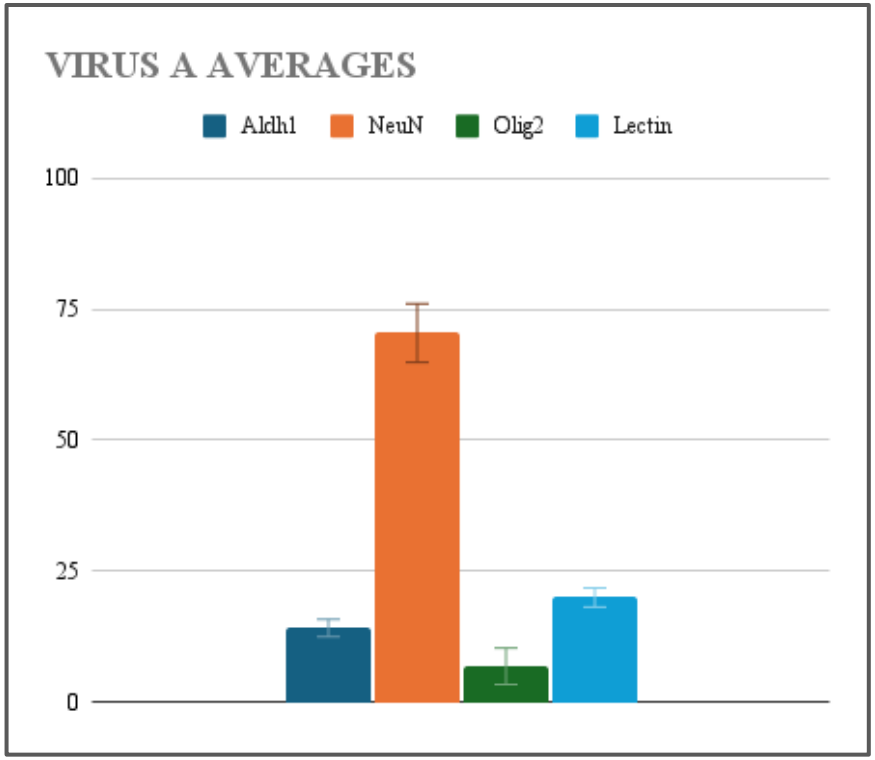


GFP, Olig2



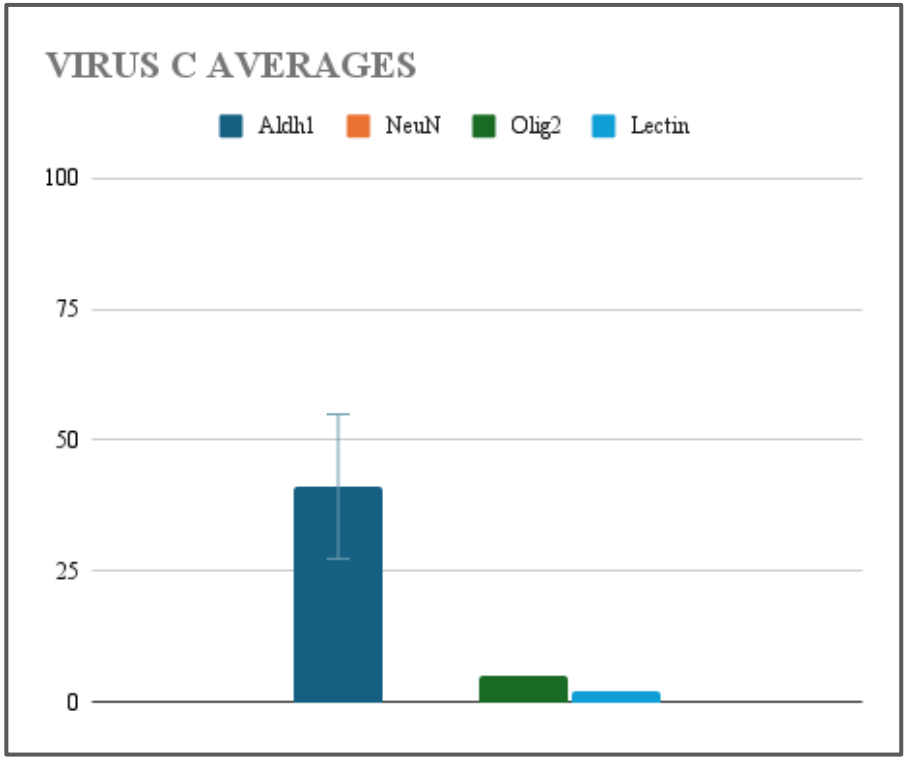
GFP, Lectin

Virus A



Positive Control → GFP labels nonspecific expression with inconsistency in all cell-type markers; copositive in NeuN, Aldh1, Olig2, and lectin

Virus C



Astrocytes → GFP colocalized with Aldh1 marker most out of all markers

Data
